

1. The State Of Montana Department of Public Health and Human Services must be required to update their registration and requirements for Family and Group Day Care and Home. The Current regulations are from 2006.
2. It is imperative that the Department of Health and Human Services inform providers of any changes to regulations and the implications of those changes. If the changes are necessary, it is only reasonable that we, as providers, be notified via mail before the changes take effect.
3. The State of Montana Department of Health and Human Services is choosing to INTERPRET regulations to suit their purposes. As a provider, I am subject to the regulations but am unable to comply when the rules are reinterpreted from inspection to inspection. The rules need to be applied as written.
4. Additionally, there is no grievance process available to those of us who are subject to the whims of the Department. It is often impossible to conform to the standards outlined since they can be applied arbitrarily or even ignored, if one is favored by the Department.
